Mortgage Backed Securities	All	0.25%	0.50%	0.25%	2.00%

Below are two examples of calculations applying the pricing schedule and methodology:

- If a client purchases a corporate bond with a 5-year maturity for a principal\* amount of \$100,000, the maximum markup is calculated as follows:  $\$100,000 \times 1.00\% = \$1,000.00$ .
- If a client sells a corporate bond with a 5-year maturity for a principal\* amount of \$100,000, the maximum markdown is calculated as follows:  $\$100,000 \times 0.50\% = \$500.00$
- If a client purchases a US Treasury Bill \$1mm notional and is charged 5bps on yield for each of the following maturities for 1 month, 3 month, 6 month and 12 month, the SC/Commissions would be as follows using the SC/Commission formula below:  
 Total SC/Commission:  $\text{Mark} \times \text{Notional} \times (\text{Days to Maturity}/36000) \times (1/100)$   
 1m = \$41.67, 3m = \$125.00, 6m = \$250 and 12m = \$500

\*Principal is defined as the dollar amount of the trade.

Note: Your revised Pricing, Commissions and Fees Schedule is also part of your Regulation Best Interest Disclosure Statement and Additional Information for Retirement Accounts which is similarly amended as of the Effective Date.

Our clearing firm, Pershing, charges an additional fee on certain fixed income transactions. This fee depends on the type of security (e.g., agencies, certificates of deposit, corporate bonds, mortgage-backed securities, municipal bonds, and U.S. Treasuries) and maturity date and is included in the price of the security.
