

Key Information Document

Foreign Exchange Pivot Leveraged Target Redemption Forward (TARF)

This is an illustrative Key Information Document (KID), that explains only the general functionality of the product representing an example trade. Your actual transaction may differ regarding costs, performance scenarios and payouts depending on the actual value and investment amount. If you want to receive a KID specific to your transaction, you may request it from your Citi Private Bank representative.

Purpose

This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

Product

Product name	184 days Foreign Exchange Pivot Leveraged Target Redemption Forward (TARF) on EUR/USD

It appears on the Commission de Surveillance du Secteur Financier register with company number B00000395. Citibank (Switzerland) AG is authorised and supervised by the Swiss Financial Market Supervisory Authority FINMA.
Date of production of the KID	July 29, 2020 11:30 CET

Please note: You are about to purchase a product that is not simple and may be difficult to understand.

I. What is this product?

Type: The product is an "over-the-counter" (OTC) Foreign Exchange Pivot Leveraged Target Redemption Forward (TARF) derivatives contract.

Objectives: The product is a complex financial instrument linked to the exchange rate between Euro (EUR) and US Dollar (USD) (the **underlying**).

By entering into this product, on each **observation fixing date** until the **expiration date** and depending on the level of the underlying, you will be required to purchase or sell EUR against USD at specified exchange rates (the **lower strike** and the **higher strike**) in the relevant amount. In this contract, the amount of EUR that you will be required to purchase or sell will depend on how often the underlying trades at, below or above the **pivot level**, the **lower strike** or the **higher strike** on the observation fixing dates.

At the **cut-off time** on each observation fixing date:

- If the level of the underlying is trading **above** the **lower strike** and **below** the **pivot level** you will be required to purchase an amount of EUR equal to the **lower contractual amount** by selling USD at the **lower strike**;
- If the level of the underlying is trading **at or below** the **lower strike**, you will be required to purchase an amount of EUR equal to the **higher contractual amount** by selling USD at the **lower strike**;
- If the level of the underlying is trading **at or above** the **pivot level** and is **below** the **higher strike**, you will be required to sell an amount of EUR equal to the **lower contractual amount** by purchasing USD at the **higher strike**; or
- If the level of the underlying is trading **at or above** the **higher strike**, you will be required to sell an amount of EUR equal to the **higher contractual amount** by purchasing USD at the **higher strike**.

On each observation fixing date, the positive difference between **the strike** and the spot rate for such observation fixing date is multiplied by the **lower contractual amount** (each a gain). On each observation fixing date, the gain on such observation fixing date is added to the gains in respect of all previous observation fixing dates (the accumulative positive gains). In the event the accumulative positive gains on an observation fixing date are **at or above** the **target redemption level**, the product will automatically terminate on such observation fixing date. There will be no further payments after such observation fixing date.

The total amount of EUR that you will be required to purchase or sell will depend (I) on the number of observation fixing dates on which the **spot rate** of the **underlying** is **at, below or above** the **lower strike** or the **higher strike** and (II) on whether the **target redemption level** is reached.

Your worst case scenario is:

- If the **underlying** trades **below** the **lower strike** on each **observation fixing date**, you are required to purchase an amount of EUR equal to the **total maximum amount** at the **lower strike**, which corresponds to a level which is worse than the prevailing exchange rate during all the life of the product;
- If the **underlying** trades **above** the **higher strike** on each **observation fixing date**, you are required to sell an amount of EUR equal to the **total maximum amount** at the **higher strike**, which corresponds to a level which is worse than the prevailing exchange rate during all the life of the product.

The product does not pay any interest or other periodic amount during its lifetime.

This is a leveraged product. Potential investors should note that the use of leverage may result in greater fluctuations in respect of payments under this product than for similar products without leverage and therefore your risks may be amplified.

Product data:

Option type	Pivot leveraged TARF	Option style	European style option
Target redemption level	USD 1,000,000.00	Pivot level	1.00 EUR = 1.20 USD
Lower strike	1.00 EUR = 1.10 USD	Observation fixing date	Monthly
Higher strike	1.00 EUR = 1.30 USD	Trade date	July 29, 2020
Lower contractual amount	EUR 50,000.00	Higher contractual amount	EUR 100,000.00

Spot exchange rate on trade date	1.00 EUR = 1.1748 USD	Total maximum amount	EUR 1,000,000.00
Cut-off time	Specific time on the expiration date defined in the contractual document	Expiration date	January 29, 2021
Delivery date	February 1, 2021		

Underlying data:

Underlying	EUR/USD	Underlying type	Spot foreign currency exchange rate
-------------------	---------	------------------------	-------------------------------------

Intended retail investor: This product is intended for retail investors with sufficient knowledge and/or experience in these types of products, an ability to bear significant investment loss and an investment horizon below one year.

Term: The expiration date of the product is January 29, 2021. The term of the product is 184 days. While the contract itself cannot ordinarily be unilaterally terminated by you or the product manufacturer, the product terms contain provisions that if certain events of default or other termination events occur, you and/or the product manufacturer can terminate the product early. If the product is terminated early, in whole or in part following an event of default or other termination event, an early termination amount will be determined in accordance with the product terms and may become payable by either you or the product manufacturer. The early termination amount is linked to market parameters and could be a substantial loss or gain to you. The return or loss that you may make on such early termination (represented by the early termination amount) is likely to be different from the scenarios described in this document, will be specific to the product and influenced by a number of factors which include but are not limited to: the movement of the Spot rate since the Trade date; the length of time until the expiration date, any fees charged by the product manufacturer as a result of the early termination or costs incurred that it may charge to you (for example, the product manufacturer may incur costs in adjusting its hedging arrangement, which will be impacted by market values and other factors, including but not limited to, the availability of equivalent hedge positions and the product manufacturer's funding costs and creditworthiness) and the amount affected by the early termination. The performance scenarios and cost tables below refer to the recommended holding period of 184 days. As the figures are not annualized, they cannot be compared to figures from products with a recommended holding period greater than 1 year or a different recommended holding period.

II. What are the risks and what could I get in return?

Summary Risk Indicator

Lower Risk < 1 2 3 4 5 6 7 > Higher Risk

The risk indicator assumes you keep the product until the end of the recommended holding period (January 29, 2021). You may not be able to end your product early. You may have to pay significant extra costs to end your product early.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 7 out of 7, which is the highest risk class. This rates the potential losses from future performance at a very high level, and poor market conditions are very likely to impact the capacity of the product manufacturer to pay you. **Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.** If the product manufacturer is not able to pay you what is owed, you could incur significant losses.

Performance Scenarios

Market developments in the future cannot be accurately predicted. The scenarios shown are only an indication of some of the possible outcomes based on recent returns.

Nominal amount EUR 10,000.00

Scenarios		184 days (Recommended holding period)
Stress scenario	What you might get back or pay after costs	EUR -12,743.25
	Percentage return	-127.43 %
Unfavourable scenario	What you might get back or pay after costs	EUR 1,074.39
	Percentage return	10.74 %
Moderate scenario	What you might get back or pay after costs	EUR 3,184.31
	Percentage return	31.84 %
Favourable scenario	What you might get back or pay after costs	EUR 4,176.41
	Percentage return	41.76 %

This table shows the money you could get back or pay over the next 184 days, under different scenarios, assuming a nominal value of EUR 10,000.00. The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products. The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the product. The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you. This product cannot be ended easily. This means it is difficult to estimate how much you would get if you end before the end of the recommended holding period. You will either be unable to end early or you will have to pay high costs or make a large loss if you do so. The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

III. What happens if Citi Private Bank is unable to pay out?

If the product manufacturer becomes insolvent or otherwise unable to deliver under the product, you should in the worst case be prepared to suffer a total loss of your investment. Your loss would not be covered by any investor compensation or guarantee scheme.

IV. What are the costs?

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the performance of the product. The total costs take into account one-off and on-going costs. The amounts shown here are the cumulative costs of the product itself, for the recommended holding period. They include potential early exit penalties. The figures assume a nominal value of EUR 10,000.00. The figures are estimates and may change in the future.

Cost over time

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

Nominal amount EUR 10,000.00

Scenarios	If you end at the end of the recommended holding period
Total costs	EUR 100.00
Impact on return (RIY)	1.33 %

Composition of costs

The table below shows:

- the impact of the different types of costs on the performance of the product at the end of the recommended holding period.
- the meaning of the different cost categories.

This table shows the impact on return

One-off costs	Entry costs	1.33 %	The impact of the costs you pay when entering your investment. The impact of the costs already included in the price. This is the most you will pay and you could pay less. This includes the cost of distribution of your product.
	Exit costs	n.a.	The impact of the costs of exiting your investment when it matures.
Ongoing costs	Portfolio transaction costs	n.a.	The impact of the costs of us buying and selling underlying investments for the product.
	Other ongoing costs	n.a.	The impact of the costs we take for managing your investments and the costs presented in Section II.

V. How long should I hold it and can I take my money out early?

Recommended holding period: 184 days

The product is designed to be held until the expiration date and you should be prepared to stay invested for the term of the product, however, it may under certain circumstances, be terminated early under the product terms as per Section I. If you wish to terminate early other than as set out under the product terms in Section I, the product manufacturer may charge you some costs as a result (more details on the return or loss that you may make on early termination (represented by the early termination amount) and the factors which may influence this return or loss can be found in the product terms (see Section I above)). The return or loss you may make on such early termination is likely to be different from the scenarios described in this document.

VI. How can I complain?

Complaints about the product, the conduct of the product manufacturer and/or any person advising on or selling the product should be addressed in writing for the attention of Complaints Team to the relevant Citi Private Bank manufacturer's address or email address: Citibank N.A., London Branch at Citigroup Centre, Canada Square, Canary Wharf, London E14 5LB or at cpbukcomplaints@citi.com, Citibank N.A., Jersey Branch at PO Box 104, 38 Esplanade, St Helier, Jersey JE4 8QB or at cpbjerseycomplaints@citi.com, Citibank N.A., Swiss Branches Prime Tower, Hardstrasse 201, P.O. Box, 8010 Zurich or at cpbswisscomplaints@citi.com, Citibank (Switzerland) AG Prime Tower, Hardstrasse 201, P.O. Box, 8010 Zurich or at cpbswisscomplaints@citi.com, Citi Private Bank, Luxembourg Branch/ Citibank Europe plc, Luxembourg Branch, 31 - Z.A. Bourmicht, 8070 Bertrange, Luxembourg or at cpbluxcomplaints@citi.com. More information on Citi Private Bank's complaints handling policy is available at www.citi-privatebank.com

VII. Other relevant information

After entering into the contract, the relevant confirmation and the underlying master agreement will constitute the contractual basis of this product. The master agreement and the relevant and applicable annexes will be provided by the product manufacturer. The confirmation has to be made available to you by the product manufacturer. The information contained in this key information document does not constitute a recommendation to buy or sell the product and is no substitute for individual consultation with the investor's bank or advisor.
