

UNSTOPPABLE TRENDS

July 15 - August 3

10:30am EST | 3:30pm BST | 10:30pm HKT

Unstoppable Trends are powerful long-term forces that are revolutionizing many aspects of our economic activities and day-to-day lives. They transcend borders and market cycles, and will continue their transformational impact well into the post-pandemic era.

In partnership with Open ExO, we are very pleased to present a series of virtual summits featuring leaders, thinkers, and innovators exploring Unstoppable Trends through the prism of cutting-edge innovations.

It will also explore the future of work and life that has been reshaped by rapidly evolving technologies and the recent pandemic.

As importantly, each session will emphasize practical implications, leading to potential actions that participants can consider in relation to their business enterprises, family offices, and investment portfolios.
